

## FIFTEEN CARS OF ORE FOR GRANBY

Rocher Deboule Mine is now Among the Shippers—Property Now Working Full Force

This week thirteen cars of copper ore, four hundred and fifty tons, were shipped by the Montona Continental Development Co., from Rocher Deboule mine, to the Granby smelter. This is the first shipment from that property or from Rocher Deboule mountain. The ore was loaded at Carnaby where the tram comes over the mountain from the workings. The Rocher Deboule property is now a hive of industry. Every department is working and from now on there will be big shipments every few days as the company is in shape to take out a hundred tons of ore a day.

## GETS FIRST HAND DATA ON DISTRICT

M. M. Stephens Spent Several Weeks Looking Over Country From Fort George to Prince Rupert

M. M. Stephens, an old timer in Prince Rupert, was a visitor to New Hazelton and district for several days last week. He was laid up for several months during the winter and for the past few weeks has been making a tour of Northern British Columbia for the benefit of his health and at the same time getting personally acquainted with the various sections and towns along the G.T.P. He visited Fort George, Fort Fraser, Vanderhoof, Telkwa, Aldermere, Smithers, New Hazelton and the old town, and at each point made trips into the country, sometimes driving but more often on foot. He had a camera with him and secured many pictures which he was unable to get otherwise and which will be very useful to him in his future business affairs.

Speaking of the new north Mr. Stephens appeared particularly impressed with the agricultural and stock possibilities of the interior and he was surprised to see so many farmers with substantial herds of cattle at this stage of the game.

He also stated that this spring he had heard a great deal about new mining money coming into the New Hazelton district and he looked for a substantial increase in the development of the properties here. Prince Rupert has great expectations of deriving much benefit from this mining district, and he believes that this camp will be to Rupert what the Boundary country was and is to Spokane. Mr. Stephens made his headquarters at the Northern Hotel while in this district and on Sunday returned to Rupert.

## TEUTONS TAKE ALLIES TRENCHES FRENCH AVIATORS MADE BIG RAID

French Lost Three Hundred Metres of Advanced Trenches, a Part of Which They Re-Take—Aeroplanes Take Important Part in Wednesday's Fighting  
Germans on Aggressive in East Prussia Near Tilsit

Paris, April 29—Official—The day has been moderately calm with no modifications in the situation. We have retained the ground which we gained during the last three days. In Champagne the Germans took from us in the region of Beausejour, 300 metres of advanced trenches. We have retaken half of them. In Argonne near Marie Therese an attack attempted by the Germans was immediately checked by us. At Les Eparges the enemy has bombarded but delivered no further attacks. The same thing has occurred at Hartmann-Weilerkopf.

During the day of April 27 our

aviators launched 32 shells on the station at Boltweiler, 7 miles to the northwest of Muelhausen, and 60 shells on the station at Arnville, and the junction of the railways of Chambley and Thiacourt have been bombarded at night. On April 28 one of our aeroplanes dropped six projectiles on the hangars of dirigibles at Freiderichshaven. The aviator observed clouds of smoke rising from the roof of one hangar. Twenty one shells have been dropped on the station, the bridges and a factory at Leopoldshen and during this bombardment one of our aeroplanes fell inside the enemy's

lines. During the day four German machines were pursued and reached by our aviators. One fell ablaze within the German lines near Briemont. Two others came to earth near out trenches. The fourth fell within our lines near Muiszon. Two German aviators were made prisoners.

Petrograd, April 29—Official—Yesterday the enemy displayed intense activity in the direction of Tilsit, Chavli and Jurborg on the upper Niemen river. In the Carpathians we repulsed on the 26th in the region of Uzsook pass vigorous attacks by the enemy, inflicting heavy losses.

## TRAIL SMELTER RESUMES PURCHASE OF SILVER-LEAD ORE AT THE OLD PRICES

Same Prices as Before the War Are Now in Effect—Higher Price Being Paid for Lead—Metal Market Has Greatly Improved in Last Month—Settlements Made on Same Basis as Before the War

The Trail Smelter is now in a position to resume the purchase of silver-lead ores, the improved market conditions having enabled the Consolidated Mining and Smelting Co. to find a better market for metals accumulated in stock than has been the case since the war began. A new basis of settlement has been arranged which, it is claimed, not only restores the rate existing before the war, but provides a somewhat higher payment for lead. The Kootenaiian gives the new settlement proposals as follows:

Payment of silver to be at 95 per cent of the fire assay at New York quotations as before.

Payment of lead to be 90 per cent of the fire assay at Montreal competitive price as established by Thos. Robertson & Co. Ltd., by adding to prices current in St. Louis, London, or other competitive market, the freight, duty, wharfage and insurance which an importer would be obliged to pay, whichever provides the low-

est price laid down in Montreal.

Quotations used in settlement for silver and lead to be the average of the second month following the receipt of the ore at the smelter.

Rates of treatment to be as prevailing up to Aug. 1, 1914.

Advance to shippers to be made shortly after sampling of 90 per cent. of estimated value on quotations current at date of arrival of the shipment at the smelter, and the balance to be adjusted at the close of the second month succeeding the date of arrival.

The duty on lead imports is increased by the new tariff and amounts to approximately \$6 a ton.

The settlement on the Montreal price is stated to be favorable to shippers in that this market has ranged approximately \$10 a ton over the foreign market. A deduction of a cent and a half per lb. will be made as a refining and marketing charge. The new set-

tlement is effective on ores received on and after April 1, 1915. Two options are offered shippers:

(a) To settle all shipments received from June, 1914, to March, 1915, on average silver prices of third calendar month succeeding arrival of shipments, in which case the smelter substitutes for the extra 4 p.c. charge on advances where made an interest charge of 6 per cent. on the net silver value only from the close of the third month succeeding date of arrival to date on which final settlement is made.

Or (b) To continue in the pool until such time as it may be advisable to sell the silver, in accordance with scheme outlined in September last. Under this option the 4 per cent charge where made will remain and no other charge for interest made.

The settlement for lead from June, 1914, to March, 1915, will remain as already arranged, at \$20 less than the New York price of the third month succeeding.

## LAST GERMAN SHIP ON PACIFIC OCEAN

Melbourne, April 28—It is officially announced that a British warship has captured the German trading steamer Alfriede, which is believed to have been the last German ship free in the Pacific.

### Will Seek Re-Election

It has been announced that H. S. Clements, M. P., Vancouver,

will be the Conservative candidate for Comox-Atlin at the coming Dominion election.

### Down From Red Rose

T. J. Vaughan-Rhys came down on Tuesday last from the Red Rose mine, on Rocher Deboule mountain, where he has been looking after the development work since the winter. He reports that a good deal of work has been accomplished and the

property is in fine shape to proceed with. While in town he expects to get some business matters fixed up and be ready in a short time to resume operations.

The many friends of Chas. Anderson, one of the pioneer prospectors in the Babine country, will regret to learn that he was laid up most of the winter with a lame back. He has recovered and is now able to resume work.

## GRANBY SMELTER INCREASING SIZE

Will be Equal to the Largest in the Empire—Ready to Operate by Next Fall

The Granby Consolidated is to enlarge the smelter at Anyox, operating on ores from Hidden Creek mine, to a capacity of 4,000 tons per day. This is the same capacity as the Grand Forks smelter, the largest smelter in the Empire. The new smelter should be in operation by fall. The company will then be in a position to produce between 50,000,000 and 55,000,000 pounds of copper per year.

With the development of the copper mines at New Hazelton and in the district the Granby smelter will be able to operate to full capacity. The Rocher Deboule is now making large shipments and others will likely be ready to ship by the time the smelter's new addition is in operation.

## RECEIVED VIEWS OF PANAMA FAIR

William Tomlinson, Canadian Commissioner, Remembered Friends in New Hazelton District

The Herald has received from Wm. Tomlinson, a member of the Canadian government exhibition commission, two booklets from the Panama exposition. One booklet gives general views of the fair buildings and the other is devoted entirely to the Canadian exhibit. Mr. Tomlinson will be remembered by many in this district from his visit here last fall collecting the mineral exhibit for the fair. He took care that the New Hazelton district ores were given a prominent place and they are attracting a good deal of notice from the visitors. Mr. Tomlinson's address is care Hotel Munro, 1822 Sacramento Street, San Francisco, California.

### Moving Drug Store

Dr. H. C. Wrinch has secured a lease on the building formerly occupied by Jack Williams as a restaurant on Ninth avenue, and as soon as he can get it fixed up will move the Up-to-Date Drug store into it. He expects to be in occupation of his new premises about the first of the month.

### Four Feet of Snow

There was a heavy snow fall on Rocher Deboule mountain this week—high up. Over four feet of snow fell and this was accompanied and followed by a high wind which caused big drifts. The sun is pretty hot now and the snow will last only a few days. It has not interfered with mining operations in any way.

# CANUCKS MADE BRILLIANT CHARGE SAVED THE DAY BUT LOST SEVERELY

After Being Completely Surrounded They Fought Their Way Out, Inflicting Very Heavy Losses on the Germans---Between One and Two Thousand Canadians Killed or Wounded, Including Officers

London, April 27—The correspondent of the Daily News writing from Northern France says: Everywhere in the department of Pals De Calais the praises of the gallant Canadians are being sung. They were put to the most severe test and they delivered the goods in real Canadian style. They had been forced to retire owing to the weakness of their support, but it was only for a few hours, and then they charged sweeping all before them and reeking terrible revenge upon the foe.

Wounded Canadians who came down to the base today, and there are many hundreds of them, were in high spirits, though many of them assuredly will never fight again. These men respect the Germans as a fighting machine, pure and simple. When asked of the German's humanity they just shrug their shoulders expressively.

They tell how, in the great Steenstrate fight, they had to retire for a spell during the thick of the tumult, leaving the wounded troops behind. Later they found all their wounded comrades bayoneted to death. Their revenge for this was swift and terrible. At the point of their own bayonets they made a horrible rush and there was no stop until only two Germans were left and these were made prisoners. All conventional rules of warfare were set aside until the German's were wiped out of the neighborhood.

The Canadians found the enemy wheeling all around them, both in front and behind their trench. Instantly they adopted themselves to the situation and fitted up a double ended trench. They had been surrounded, enveloped and hemmed in on all sides. But little did it avail the enemy. Yelling their war cry they pulled together, fighting back to back with infinite courage and dash,

giving the Germans behind them as well as those in front of them the most terrible punishment.

London, April 27—Official—1st Severe fighting to the north east of Ypres still continues, the general situation remains unchanged. Our left flank is in readiness with its line to meet the conditions due to the original forced retirement of the French who had to face north and to extend west beyond St Julian. This extension weakened our line for a time, and after a gallant resistance by the Canadians against superior numbers St. Julian was captured by the enemy. Our lines now run south of this place.

2nd—Our troops to the east of Ypres have borne the brunt of repeated heavy attacks which they have stubbornly opposed through out the battle in an entirely unexpected situation which has demanded both gallantry and fortitude by the men and quick resources and other military qualities by their commanders.

3rd—Attacks were also delivered by the Germans yesterday on the salient to the east of Ypres. In spite of the use by

the enemy of asphyxiating gas, the attacks were repulsed, and German officers and men were captured. In the fighting during the last three days we have inflicted very heavy losses upon the Germans. Our losses have also been heavy.

A German wireless report that four English heavy guns were captured is untrue.

One of our aviators dropped bombs on Courtrai station this afternoon and destroyed the junction, although wounded he brought his machine safely back to our lines.

Calais, April 27—The German assault on La Bassee continues without them gaining any ground and their Ypres artillery has been destroyed.

London, April 28—The Canadian casualty list it is now feared will reach nearly two thousand. The Canadian cavalry charged through the Germans three times successfully. Lt. Col. Hart-McHarg was killed while rescuing a private from a machine gun. A million Germans are reported to be before Ypres. Canadian reinforcements have left England.

## GERMAN LOSSES AT YPRES HEAVY

Over Seven Thousand Wounded at the Burges Hospitals—They are Being Forced Back

London, April 28—It is officially announced that several German trenches were captured and also six quick firers and 220 prisoners at Het Sas. The Tueton attack failed, but there is much activity at the front. The enemy is contesting every foot of the ground, but are slowly being forced back over the Ypres canal. The enemy's loss is enormous, there being 7,200 German wounded in Burges hospitals alone.

Airfighting is in progress on a large scale. The French took

guns, two bomb throwers and much war material, together with several hundred prisoners. At a single point at Ypres 600 dead Germans face the French line. Two hundred thousand fresh French troops have been rushed to Flanders and in northern France all trains north of Paris are carrying troops.

## MORE HARD FIGHTING IN THE CARPATHIANS

Petrograd, April 28—Near Osowetz there has been an artillery duel. In the Carpathians on Sunday the enemy after long artillery preparations assaulted the heights northeast of Oroszepatka. The storming parties got as far as the barbed wire entanglement where they were mowed down by

our fire. Sunday night the enemy delivered fruitless attacks in the region of Uzsook pass. In the direction of Stry stubborn fighting continues. An entire Austrian battalion surrendered yesterday. During the day we captured two aeroplanes.

## FRENCH IN TURKEY

Paris, April 28—French troops have occupied Kumkaleh, a Turk fortress on the Asiatic side of the entrance to the Dardanelles. This announcement was officially made tonight. During disembarkation on Sunday of the allied forces at the Dardanelles French troops comprising infantry and artillery were designed for operations at Kumkaleh, on the Asiatic side. This was successfully

## SYNOPSIS OF COAL MINING REGULATIONS.

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be stated out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior,

N. B.—Unauthorized publication of this advertisement will not be paid for Oct. 4 6m

accomplished. Aided by French warships and under fire of the enemy our troops succeeded in occupying the village and have continued its occupation despite seven counter attacks at night supported by heavy artillery. We took 500 prisoners and the losses to the enemy appear to have been very considerable. General disembarkation continues.

## ALLIES' TROOPS LAND IN TURKEY

Now on Both Sides of the Dardanelles  
—French Took 500 Prisoners  
—Russians Are Coming

London, April 28—Official—After two days of hard fighting the troops landed on the Gallipoli peninsula are thoroughly making good their footing, with the effective help of the navy. The French have taken 500 prisoners. Allied forces under Sir Ian Hamilton have effected a landing on both sides of the Dardanelles under excellent conditions. Many prisoners have been taken and our forces continue to advance.

## RUSSIANS ARE COMING

Petrograd, April 28—The Russian expeditionary forces which went to the aid of the Anglo-French troops that are landing at Constantinople, have concentrated at Odessa to be reviewed by the Czar. They will effect a landing on the eastern coast of Turkey under the protection of the Russian fleet.

FRIDAY, APRIL 23, 1915

THE king of the wildcat real estate promoters, the minister of lands for British Columbia, will supply anyone who applies with a pamphlet entitled, "Loans to Farmers—Agricultural Act, Passed by the McBride Government, March 1, 1915." The Prince Rupert Conservatives, or Wm. Manson, had a large number of these pamphlets printed at the government-supported print shop in Prince Rupert and circulated them throughout this district. Only a few of the sections, possibly three, are given, and these point out all the good things the government took onto itself the power to do to the farmers. It reads very nicely and it almost makes the farmer jump with delight. But up to the present we have not heard of a single application being made for a loan. The pamphlet does not say that the money is not available now. But the farmers are wise to the government's methods and cannot be gulled into any such trash as Wm. Manson, Hon. Wm. Ross or any of their kind springs at election time. Everyone knows that the farmers can get no money from the government. It is not intended that they should get any money. Bowser took good care of that when he provided that the act shall not come into effect until he personally sees fit. Bowser knows that his government cannot get any money any place or for any purpose, no matter what security he has to offer. Bowser does, however, sanction his understudies sending out literature misrepresenting conditions. Hon. Wm. R. Ross, being one of the weakest tools in the government, has his name attached to many of the fake pamphlets. It is time for a change—not only in the government, but in the methods of sending out literature. When a government will not give the truth how can the truth be expected from any other concern.

THE European war is blamed for a great deal that should not be credited to it, the most serious being the shortage of money and the inability for wildcat business firms and wildcat governments to meet their obligations. The truth of the matter is that a very great deal of the shortage of money and the numerous business failures is due to rotten management and neglect of the first principles of business. The Bowser-McBride government set the example by securing credit on imaginary paper assets—it was a cinch when everyone had money to lend and no particular burden of taxes—now the government cannot meet its obligations, nor yet can it borrow any more money to carry on further wildcat schemes. Individuals looked about to see some one else who was supposed to be making money,

and without any previous knowledge of the business, and only a shoe string or a collar button for assets, jumped in, in an endeavor to take off the cream. For a few years that was alright, but as soon as a change in conditions was brought about the wildcat governments and the wildcat business firms (the majority of them being government block-suckers) went to the wall along with the government's bank account. These people blame the war. The government got into a sink hole and had no money to support the suckers, hence the failures. Following the government example, a lack of management, a lack of business knowledge and a lack of original assets will be found to be the cause of more failures than anything else. There may be some legitimate businesses which will suffer from the failure of the wildcats, and some of them may even be forced to suspend, but the majority of the failures were wildcats in the beginning and the public is now paying the bills. Any individual or any business that lives off graft must naturally pass away when the graft dies.

DURING the past few weeks a good deal has been reported as to the copper situation in relation to Germany. That country has supposedly been seeking copper at any price and from any source. At the same time Great Britain has been using up immense quantities of copper and zinc and is now taking seriously the source of her future supplies. Britain is short on copper and zinc now and the longer the war is prolonged the more distressing will become the situation. For this reason the Imperial ordinance department has a representative in Canada now looking carefully and thoroughly into the possibilities of this country supplying the demands. If it is found that Canada can deliver the goods it is the intention of the Imperial government to establish a copper refinery at as early a date as possible in this country. British Columbia is most likely to be the site of the new refinery, as the greater portion of the ore will come from this province, which is rich in copper, both low and high grade. No matter where the refinery is situated, Northern British Columbia, and especially the New Hazelton district, will be greatly benefitted, as some of the largest deposits of copper in the province are right around New Hazelton. The ore is high grade, too, and in large bodies. A refinery operated by the Imperial government would mean a vast increase in copper production in B. C. and greater profits for the producers who under present conditions have to ship all the copper from the smelters to the United States for refining.

## FARMING HINTS

### Growing Vegetable Seeds

Mr. Farmer did it ever strike you that there was an excellent business opportunity awaiting you in the production of vegetable seeds? The process is sim-

ple and the work is light. The department of agriculture at Ottawa will supply you with full information.

On the basis of Ontario's field root crop for 1914, Pro. Zavitz of the Guelph Agricultural College, figured that in 1915 farmers will require almost a million pounds of seeds, made up as follows:—304,000 pounds of mangels, 222,

500 pounds of sugar beets, 286, 100 pounds of turnips, and 8,568 pounds of carrots. Formerly the most of these seeds came from England, France and Germany, the home-grown proportion having been very small.

All tests made at the agricultural college have been very successful for the past five years. It has also been demonstrated

that the farther north seeds are grown the hardier they are and give a higher record of germination. The work is not only profitable, but very interesting.

### Suitable Grains for B. C.

In bulletin No. 81 of the regular series issued by the director of the Dominion Experimental Farms and entitled, "Division of Cereals: Summary of Results, 1914," Dr. Charles E. Saunders, Dominion Cerealists, recommends the following varieties of grain for British Columbia:

Winter Wheat—Kharkov or Turkey Red (especially where the winter is dry), Egyptian Amber, Dawson's Golden Chaff (the last mentioned for pastry or biscuit flour).

Spring Wheat—Marquis, Red Fife and Huron.

Oats—Banner and Ligowo; for very short seasons and fair rainfall, Daubeney and Eighty Day.

Barley—Manchurian, Odessa, and Ontario Agricultural College, No. 21, six-rowed varieties; Canadian Thorpe, Swedish Chevalier and Early Chevalier, two-rowed varieties.

Peas—Arthur Selected for early ripening; Chancellor, Golden Vine and Prussian Blue are among the best of the other varieties.

Owing to the varied climates of British Columbia, only a few general suggestions are made.

# The Optimism of Advertising

**A word that is frequently misused is "optimism." A man engaged in any business whatsoever who looks for success without exercising his faculties to achieve that end, is not an optimist, but a fool**

Two things make advertising almost a synonym for optimism. One is that the advertiser who would be successful must be an optimist. The other is that when an advertiser loses his optimism he generally cancels his advertising.

"Business is rotten," exclaims the manufacturer, and forthwith orders all his advertising stopped, little realizing that his own action is one of the principal causes that makes business rotten.

Cancelling advertising is so easy that it is nearly always the first step toward retrenchment. The matter is seldom decided on its merits. It is impulse. Advertising must be an expense, the advertiser reasons. Therefore to cut it off effects a saving.

The stoppage of advertising in times of stress and change has two bad effects upon the business involved. It turns off immediately a method of securing new business and holding old business. In addition to that, it advertises the pessimistic views of the advertiser, and therefore spreads his own lack of

faith in himself, his country, his goods, and the future to other business men who are perhaps on the verge of doing the same thing.

Without in any way minimizing the crisis which the world is now facing, without ignoring the fact that a long, expensive war in Europe will result in a great deterioration of values and a tremendous adjustment of finance and commerce when it is over, there is nevertheless sufficient ground for believing that this country is going on, that the manufacture and consumption of goods will continue, and that the manufacturers who are enterprising, far-sighted and alert enough to take advantage of existing and new markets and to push their business as they would in ordinary times, are going to benefit by their actions.

The point is that the war will either end everything in the world or it will not. If it does not, business, among other things, must go on. In our own country it must go on now. It cannot wait until the war is over.

**The real Optimist is the man who hopefully faces conditions as they are**

Bob Wall left this week for the  
Rocher Debole mine, where he  
will work in future.

Jas. Dunbar, of Telkwa, came  
down on Sunday morning's train  
and is staying at the Northern.

Provincial Horticulturist Tom-  
linson, Prince Rupert, was a vis-  
itor in town over the week end.

F. C. McKinnon spent the fore  
part of the week looking over  
some mining properties on the  
lower Skeena river.

It is expected the Dominion  
telegraph office will be moved to  
a building on Ninth avenue, ad-  
joining the Union bank.

A gang of men has been put

to work ballasting the G. T. P.  
line through this town. Tracks  
will be lifted eighteen inches.

Roy Clothier, Silver Cup mine,  
Nine Mile mountain, spent Sun-  
day in town. The property will  
soon be in full operation.

The many local friends of Lyle  
Wilson and Miss Ruby McMullin  
will be interested to hear that  
they were married in Prince  
Rupert on April 15th.

The G. T. P. is preparing to  
inaugurate a tri-weekly service  
between Edmonton and Prince  
Rupert to capture some of the  
tourist traffic to the Panama.

Robt. Burns is in New West-  
minster. He will bring his fami-

ly back with him and make his  
home in Telkwa where he will  
take charge of the New Telkwa  
hotel.

So far as can be learned the  
provincial government is doing  
nothing this year in the way of  
experimental work for the benefit  
of the farmers in this district.

Local prospectors and miners  
have started out this week to get  
their assessment work done so as  
to be ready for any mining move-  
ment which might start within a  
few weeks.

Dr. Kergin, of Prince Rupert,  
was a guest of Dr. Wrinch Sat-  
urday night. He assisted in an  
operation at the hospital on Mr.  
Hall of the government office  
staff in the old town.

Messrs. Bonthorne, Vancouver,  
mining engineers well known in  
western Canada and the western  
states, were in this district for  
several days looking over proper-  
ties. They expect to report on  
their investigations in a few days.

### Why There's No Business

When you cease advertising  
you discontinue circulating your  
business activities, consequently  
you cease soliciting the public  
patronage and are preparing the  
casket for another liquidation.  
If you never advertise you have  
no claim to public patronage. It  
is not surprising that so much  
stuff is bought outside, nor yet is  
it any wonder people look for and  
send for catalogues and price  
lists. They have not seen a  
local merchant's advertisement  
in the local paper for many long  
months.

The Herald has received notice  
that Hon. W. R. Ross is devoting  
his attention to securing new  
markets for British Columbia  
lumber. Another instance of  
helping the wealthy corporations  
at the expense of the masses.  
The ministers are looking for a  
campaign fund.

### Bridges Destroyed

Word was received late Thurs-  
day night that the Main street  
and Granville street bridges in  
Vancouver had been blown up  
by gas bombs. Aliens had been  
celebrating a presumed defeat of  
the Canadians and are thought  
to be responsible for the deeds.  
Four arrests have been made.

London, April 30 — A Zeppelin  
dropped bombs last night at Bury  
St. Edmunds, in Suffolk county,  
setting several buildings on fire,  
says a Central News despatch.

## FARMING HINTS

### Lime in Agriculture

One of the principal functions  
of the chemical division of the  
Dominion Experimental Farms is  
to attempt the solution of prob-  
lems connected with the main-  
tenance and upbuilding of soil  
fertility. Among the many val-  
uable results so far obtained in  
these investigations is the dem-

### LAND NOTICES

Hazelton Land District—District of  
Cassiar  
Take notice that we, E. S. Denison  
and L. M. Morrison, of Prince Rupert,  
occupation ranchers, intend to apply  
for permission to purchase the follow-  
ing described lands: Commencing at a  
post planted at the south-west corner  
of lot 2890, thence south 20 chains,  
thence west 40 chains, thence north 20  
chains, thence east 40 chains to point  
of commencement, containing 80 acres,  
more or less.

Edgar S. Denison  
Lewis M. Morrison  
Dated Dec. 19, 1914. Pub. Jan. 15

### COAL NOTICES

Stikine Land District—District of Cassiar.  
Take notice that I, Fred O. Curry, of  
Windsor, N. S., merchant, intend to  
apply for a license to prospect for coal  
and petroleum over the following des-  
cribed lands: Commencing at a post  
planted at the s.-w. cor. of coal license  
No. 9244, being 2 miles west and 3  
miles north from the s.-w. cor. of coal  
license No. 9263, thence north 80 chains  
to the s.-w. corner of coal license No.  
9251, thence west 80 chains along the  
south boundary of coal license No. 9254,  
thence south 80 chains and east 80 to  
the point of commencement, being 640  
acres, known as claim No. 8.

Fred O. Curry  
Date, March 16, '14 Pub. April 17

onstration of the vital part play-  
ed by lime in the increase of a  
soil's productiveness.

The subject is treated in an  
interesting way in Bulletin 80 of  
the Experimental Farms' regular  
series. Send for one.

## Seed Advance to Settlers

One car load of Abundance Seed Oats  
is being imported into the Northern  
Interior by the Department of Agricul-  
ture for sale to settlers who are unable  
to pay cash for their seed. Notes due  
Dec. 1st, 1915, without interest are re-  
quired for all seed obtained. Applica-  
tion forms are available at the govern-  
ment office, Hazelton, or the Agricul-  
tural office, Telkwa. Applications  
should be filled and forwarded at once,  
with notes to cover purchase price and  
the freight from Telkwa to local sta-  
tion. The price at Telkwa is 3 cents  
per pound. This will make the price at  
Hazelton \$3.22 per hundred. The max-  
imum order allowed any one settler is  
1000 pounds. Orders should be multi-  
ples of 85 pounds. No grain will be  
sold for other than seeding purposes  
and purchaser must have his acreage  
ready for oats vouched for by two of  
his neighbors.

H. E. WALKER  
412 Provincial Agriculturist
